

NEURO LEADERSHIP

Onsite — 2 days

"You Can't Win in Life if You Are Losing in Your Mind."

Our understanding of how the brain, our most mysterious part of our body, works, has improved tremendously over the past 20 years. Neuroscience has brought a variety of understanding and enlightenment about how our brains work. In addition, neuroscience also gives us the opportunity to better understand why and how people behave, make decisions, and interact with others. At the same time, the need for effective and reliable leaders is also increasing, both in business and community organizations. The current challenges are simply overwhelming. A leader is required to be able to show performance, collaborate, innovate and remain flexible to act in a complicated and complex world. Neuro Leadership is the latest breakthrough in the field of leadership, using neuroscience knowledge centered on our understanding of how the brain works. In Neuro Leadership we will examine the latest breakthroughs in neuroscience and discuss how our understanding of how the brain works will help us to improve our decision-making ability, performance improvement, teamwork and manage change in organizations. Maximizing our brains and maintaining a balance between our brains and bodies is fundamental knowledge that we must have if we want to lead ourselves and others in this 21st century.
