

PROJECT MANAGEMENT 101 (WATERFALL & AGILE)

Onsite — 2 days

Project Management 101 covers the fundamental principles and practices of managing projects, and it often involves two primary methodologies: Waterfall and Agile. In practice, organizations may adopt a hybrid approach, combining elements of both Waterfall and Agile methodologies based on project requirements and the organizational culture. The choice between Waterfall and Agile often depends on factors such as project complexity, size, and the level of flexibility required.

Learning Objectives

Introduce Project Management concept and Agile way of working (Scrum Framework)
